Psychology 3ZZ3E
Interventions for Persons with Developmental Disabilities: Treatment Issues
2005

Joel Hundert, Ph.D. 905-570-0777 Fax: 905-570-0778 Email: hundert@mcmaster.ca
Nicole Walton-Allen, Ph.D. 416-251-9277 Fax: (416) 251-468 Email: NicoleWA@on.aibn.com

COURSE OUTLINE

A. PURPOSES OF THE COURSE:

General Description: This course explores conceptual and applied issues pertaining to the adjustment of children and adults with developmental disabilities in community settings. Students will learn alternative approaches to the treatment of persons with developmental disabilities and evaluation of intervention outcome with an emphasis on a behavioural perspective. The goals of the course are:

1. To familiarize students with the theoretic, conceptual, and treatment issues pertaining to interventions for persons with developmental disabilities.

2. To enable students to discuss, criticize, and compare the theoretical, conceptual and applied issues under study.

3. To provide student with limited experiences in the treatment planning and delivery for persons with developmental disabilities.

Format
The course consists of 12, 3-hour lectures. With each lecture there are associated assigned readings. For topics not well covered by the readings in the text, extra readings will be assigned and held on reserve at Mills Library. Cue sheets of the important points in the readings can be found in this outline. There will also be periodic videos, or guest lecturers in the course. Some time will be set aside each lecture for questions on the lecture or the readings. In addition, two Teaching Assistants will be available to aid students in the course material and will announce office hours during which they would be
available.

C. TOPICS

Applied behavioural interventions - introductory topics
Applied behavioural interventions - advanced topics
Social skills training
Generalization and maintenance of effects
Instructional techniques
Psychopharmacology
Individual and group psychotherapies
Parent training
Staff training
School-based interventions
Dealing with dangerous behaviours (e.g., pica, self-injurious behaviours, violence)

D. Grade Determination

Mid-term exam - 35%
Summary of a paper – 5%
Final exam - 35%
Term paper / mini-practicum- 25%

E. MID-TERM EXAM

A mid-term exam will be given in class, pertaining to the content of the course covered in lectures and text until that point. The mid-term exam will consist of short-answer questions. The results will comprise 35% of the course final grade.

F. SUMMARY OF TWO PAPERS

You will select a topic for your final paper from the following:
Supported inclusion of children with developmental disabilities
a) teaching social skills: social stories, social script training, classwide programs, peer-mediated approaches
b) teaching communication: Augmentative and Alternative Communication (PECS, sign language), incidental teaching of language
c) dealing with problem behaviours: positive behaviour supports, functional
communication training

d) following routines independently: visual schedules, picture activity schedules, prompting and prompt-fading procedures
e) Teaching children with developmental disabilities within a group: individualized group instruction
f) Teaching cognitive skills: perspective-taking, self-management, making inferences

Supported inclusion of adults with developmental disabilities

a) supported living
b) supported employment
c) supporting families with adult children at home

Other topics pertaining to the course subject may be selected with instructor permissions. All topics pertain to: a) treatment procedures demonstrated to be effective in scholarly articles; and b) used with persons with developmental disabilities in an inclusive environment.

You will email your paper by March 3, 2005, 12:00 pm to hundert@mcmaster.ca. It should be laid out in the following format:

Authors: Smith, H. & Jones, A.K.
Title: The effect of reinforcement on speech-initiation of young children with Down Syndrome

Participants: Describe the number and characteristics of participants of the study
Setting: Describe where the study took place
Measures: Describe the measures that were used. How was the reliability of the measures demonstrated?
Design: Describe the research design that was used
Intervention: Describe the intervention that was used.
Results: Describe the main effects of the intervention and if generalization was assessed.
Contribution: In your opinion, what were the main contribution of this article to the literature
Limitations: What were the main limitation of the paper.

The summary will be marked out of 10 and converted to a score out of 5% of your total grade. The marking will be as follows:
Lay-out – 2
Description of Participants Setting and Measures – 2
Description of and Design and Results – 2
Contribution – 2
Limitations - 2

One mark will be deducted for each day the summary is late.

G. FINAL EXAM

A 2-hour final exam will be given at the end of the course and will cover material presented both in the lectures and text from the point of the midterm. The final exam will consist of short-answer questions. The final exam is worth 30% of your total grade.

H. TERM PAPER / MINI-PRACTICUUM

There is a limited number of spaces for students to take a min-practicum pertaining to intervention with persons with developmental disabilities. Mini-practica may be provided by the course instructors or students may arrange their own placement with permission of the professors (see end of outline).

The mini-practicum will entail:

- A total of 20 hours of direct contact with the client, not including any training time
- Students can find their own placement as long as it is approved by one of us. The placement must be at a setting in which students can be supervised in the implementation of an assessment plan. Please recognize that you are to conduct yourself with utmost professional respect and courtesy. Also you are to maintain the strictest confidence about the individual with whom your are working.
- For those needing our approval, please submit the following brief description found at the end of this course outline.
- Also note that at the end of this outline is a form that explains the expectations to potential hosts of your placement and a waiver of liability.
- Please keep track of the dates and times of your placement and include that information in the method section of your paper.
You will submit at least a 7-page, double-spaced paper on the results of your placement.

Include at least 4 recent research articles to support the points you raise in your paper.

The write-up of the mini-practicum should be under the following headings:

- **Introduction** (describe the setting, the person, presenting problem, history of treatment, research supporting particular, etc.)
- **Method** (describe your involvement, list the dates and times of your placement, describe the assessment method, any problems encountered).
- **Results** (collect data on the effect of the treatment on the person. The results are to be described in the body of the paper and to be supplemented by charts or graphs.)
- **Discussion** (discuss your conclusions about your placement, what was the benefit for the client, for you, what were your main learnings, what would you suggest for future attempts of helping the client)

Include in your introduction at least 5 references from scholarly sources. You must use American Psychological Association format in the paper.

Marks for the mini-practicum will be based on the thoroughness and logical flow of the ideas, synthesis of information, and writing style as follows:

- **Introduction** 20 marks
- **Method** 30 marks
- **Results** 30 marks
- **Discussion** 20 marks.

**Term Paper.** The term paper would be a scholarly report of an empirical, but applied question pertaining to assessment of persons with developmental disabilities. See the topics listed under “Paper Summary”. The paper should be at least 15 double-spaced, pages. You should use at least 8 scholarly articles to support the points you raise in your paper. Discuss the treatment issue, what treatment approaches have been used, their relative efficacy, limitations, advantages and recommendations to the field for: (i) future research; (ii) implications for practitioners in the field. You must use American Psychological Association format in the paper. A copy of the APA guidelines should be available in the library or bookstore. The paper will be marked as follows:
The term paper will be graded for quality in the following areas:

Development of ideas/synthesis and analysis - 25%
Logical flow/Organization - 25%
Thoroughness - 25%
Writing style/APA format - 25%

Both the mini-practicum and the term paper are due the last day of classes in class. Five marks will be deducted for each day the paper is late.

H. COURSE SCHEDULE

1. January 6
LECTURE: Applied behavioural interventions - introductory topics (JH)
Video: on ABA with children with autism
READING: Chapter 26

2. January 13
LECTURE: Applied behavioural interventions - advanced topics (NWA)
READING: Chapter 27

3. January 20
LECTURE: Social skills training (JH)
Video - Classwide Social Skills Training
READING: Module 9.1: Promoting Peer Interaction

4. January 27
LECTURE: Generalization and maintenance of effects (NWA)

5. February 3
LECTURE: Interventions for children with autism (JH)
READING: Chapter 20

6. February 10
LECTURE: Psychopharmacology (NWA)
Video
READING: Chapter 25

7. February 17: Mid-Term Exam

February 23: MID-TERM RECESS
8. March 3
LECTURE: Individual and group psychotherapies (NWA)
READING: Paper summaries due
READING: Chapter 28

9. March 10
LECTURE: Parent training (JH)
READING: Chapter 21, 22

10. March 17
LECTURE: Staff training (NWA)
READING: Chapter 29

11. March 24
LECTURE: School-based interventions and instructional techniques (JH)

12. March 31
LECTURE: Dealing with dangerous behaviours (e.g., pica, self-injurious behaviours, violence) (NWA).
READING: Review of lectures and readings from Mid-term
READING: Term Papers due
READING: Module 5.2: Dealing With Difficult Behaviours

J MISCELLANEOUS

Details of the course requirements may be subject to change. If so, students will receive a revised course outline.

**Message from the Chair** - The instructor cannot be responsible for returning long distance calls from students. Any student wishing to reach an instructor is invited to e-mail the instructor.

**Policy Reminder** - Attention is drawn to the "Statement on Academic Ethics" and the "Senate Resolutions on Academic Dishonesty" as found in the Senate Policy Statements distributed at registration and available in the Senate Office. Any student who infringes one of these resolutions will be treated according to the published policy.

**Marking** - The instructor reserves the right to adjust final marks up or down, on an individual basis, in the light of special circumstances and/or the individual's total performance in the course. A percentage marking system will be used. The course mark will be converted to a letter grade by the Registrar's office using the Senate-approved, standard scale.
K. **Reading Cues**

The following are cues for each of the readings to suggest what is important to learn. Any questions on the exam will be based on these cues.

**Chapter 20: Cognitive and Vocational Interventions**

Pg 266  What is taught to students with severe to moderate MR
Pg 267  How are new responses taught?
Pg 270  Where does teaching occur?
Pg 271  What is taught to students with mild MR
Pg 273  How are new responses taught?
Pg 275  Where does teaching occur?

**Chapter 21: Families Coping with Mental Retardation**

Pg 280  How does family life cycle apply to families with a child with mental retardation?
Pg 281  Describe how families with a child with mental retardation are at heightened risk for depression.
Pg 282-284 Describe how a family assessment is conducted.
Pg 285-286 Describe the existential and reality crisis facing families.

**Ch 22: Parent Training**
Chapter 26: Applied Behavioral Interventions

Pg 341. Learn the focus of applied behavioral interventions. Measurement techniques are either continuous or discontinuous.

Pg 342 What is functional analysis.

Pg 343 Describe the Axelrod et al. (1993) model.

Pg 345 Describe positive reinforcement, shaping.

Pg 346 Define stimulus control, stimulus fading, stimulus shaping, overselection.

Pg 348 What is the least restrictive treatment model? Define DRA, DRO, DRL.

Pg 348 Describe functional communication training.

Pg 349 Define extinction and its secondary effects.

Pg 350 Define the punishment procedure presented.

Pg 351 Define stimulus and response generalization.

Ch 27: Behaviour Therapies

Pg 357 Describe the multimodal functional approach.

Pg 359 - 361 Describe steps 1, 2 and 3.

Pg 361 What is the benefit of identifying an individual's coping skill deficits?

Pg 364 What is the difference between a skill deficit and a performance deficit?

Pg 366 Describe how competing behaviours and competing emotional arousal were treated.

Ch 28: Counselling and Psychotherapy

Pg 371 What erroneous assumptions and biases have hampered the availability of counselling for people with mental retardation?
Pg 372-374 In what ways can counselling techniques be modified?
Pg 374 Describe a directive style and how it should be used with people with mental retardation.
Pg 376 How does transference and countertransference play themselves out with people with mental retardation.

Chapter 29: Management and Organizational Issues

Pg 384-390 What are the main areas of responsibility for psychologists working with people with developmental disabilities.

Pg 350 Why should one program for generalization?
Pg 350-365 Describe the 9 generalization strategies.

Pg 97- 98: What is positive behaviour supports and the suggested 4 central messages. 
Pg. 99 Describe functional assessment 
Pg 101: How behaviour support should be comprehensive. 
Pg 102: The unit of intervention

Modules 5.2 and 9.1 are from the training for the Autism Initiative and all content is relevant.
MINI-PRACTICUM APPROVAL

________________________________________________________________
Dear Potential Placement Provider:

This is the description of the expectations for students seeking a mini-practicum in the McMaster University Psychology course 3Z03, Assessment of Persons with Developmental Disabilities. The course is introducing 3rd year psychology students to conceptual and practical issues of assessment of this population. In the mini-practicum, it is expected that the student get permission to participate with children or adults with developmental disabilities in a natural setting. The activities you set up for the student should be ones in which the student is directly interacting with the person with developmental disabilities and collecting some type of objective information.

It is expected that the student submit a 10-page, double-spaced paper on the case study with support literature. The minimum number of student time to commit is 20 hours.

Obtaining signed consent, oaths of confidentiality, etc. is the responsibility of the placement. Please ask the student to sign the enclosed waiver indicating that the placement is not responsible for any mishap that may happen to the student.

Joel Hundert Ph.D., C.Psych.
