Honours Human Behaviour (B.A.Sc.)

Program Overview
The Hons B.A.Sc. (Generalist Stream) offers a combination of breadth and depth of education in human behaviour. Students completing this program will be well equipped to enter any work environment that requires understanding the determinants of human behaviour – the social influences on behaviour; the basic neuroscience underlying behaviour; the stages of language development; and the stages of early development and their impact on human behaviour. The Generalist stream of the Hons B.A.Sc. program gives students substantial flexibility to customize their degree to focus on subspecialty areas of their choice. Capstone experiences focus on science literacy and science communication to a broader audience. The Generalist stream is an excellent preparatory degree for a range of other applied certificate/diploma training, and in itself offers a more applied versus research-focused Honours degree than the Hons PNB degree.
