

PRESIDENT'S AWARDS OF EXCELLENCE IN COURSE OR RESOURCES DESIGN

Social Sciences (Morning Ceremony)

IntroPsych Project

Dr. Joseph A. Kim

*Assistant Professor, Department of Psychology,
Neuroscience & Behaviour*

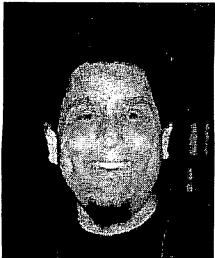

As a Teaching Professor, Joe Kim is actively involved in all aspects of the scholarship of teaching and learning. He co-ordinates the innovative Introductory Psychology program, which combines traditional lectures with enhanced on-line resources and small group tutorials. The program has been prominently featured in Maclean's, Globe and Mail, and CHCH News. He also directs the Pedagogy Research Lab which focuses on teaching, learning and technology, and organizes the popular Discover Psychology Public Lecture series.

Chris McAllister

(Science Media Lab, Supervisor)

Chris McAllister came to McMaster in June 2006 from Geneva Switzerland. He was responsible for the original design and workflow implementation of the technology responsible for the IntroPsych online lecture model, as well as the community and content delivery elements of Intropsych.net.

Matt Pachai

*(Department of Psychology, Neuroscience &
Behaviour, Graduate student)*

Matt has been involved with the IntroPsych program since its inception. He served as the Senior Teaching Assistant with duties that included administration of the program's 60 TAs and assisting with the creation of course materials such as quizzes, tutorials, and assignments. In 2009/2010 he was responsible for revising the web modules, crafting a variety of new tutorials, and helping to write new student assessment material. Pachai continues to work with the IntroPsych development team.

Greg Atkinson

(Science Media Lab, Specialist)

Greg is a Media Specialist and has been involved with the IntroPsych project since December 2006. He worked on module development and workflow enhancement as part of his Multimedia thesis project. In his current role, Atkinson uses a variety of multimedia tools to help develop, maintain and monitor projects through pre and post executional analysis.

Eric Durrant

*(Department of Psychology, Neuroscience &
Behaviour, Graduate student)*

As a veteran Teaching Assistant from the previous Introductory Psychology program, Eric Durrant's efforts ensured a smooth transition to the new program. Eric has assisted with developing the broad structure and curriculum of the IntroPsych courses, including the high quality, standardized content used across all tutorial sections. He is currently a teaching assistant for the department.
