What Can I Do With My Life Sciences Degree??

When trying to decide which careers are available with a Life Sciences degree, remember...your choices are endless! Since you have chosen to sample from many areas of science, this provides you with many roads to follow. Careers related to health care, environmental studies, lab or field research, teaching, and more! Here are a few ideas to get you started, but remember: the variety of career options available to you are determined by the amount of research you put into finding them!

Fields requiring an undergraduate degree:

Agricultural Science	Flavours/Fragrances Research	Military Officer
Biological Tech	Food Inspector/Scientist	Pharmaceutical Sales
Biologist	Horticulturist	Technical Sales Rep
Botanist	Hospital Administration	Public Administration
Chemist	Marine Biologist	Public Health
Environmental Tech	Medical Lab Tech	Quality Assurance & Control

Fields requiring further post-graduate studies:

Athletic Therapist	Dental Hygienist	Forestry Technician
Audiologist	Dental Lab Tech	Genetic Counselor
Biomedical Engineering	Dietician	Health Care Administrator
Cardiovascular Tech	Doctor	Medical Imaging Tech
Chiropractist	Electroneurodiagnostic Tech	Naturopathic Doctor
Chiropractor	Environmental Consultant	Pharmacologist
Conservation Officer	Environmental Health Officer	Radiation Therapist
Dentist	Epidemiologist	Respiratory Therapist
Dental Assistant	Forensics Specialist	Teaching

The Michener Institute

The Michener Institute is located in Toronto and offers a variety of applied health science programs for further post-graduate studies. Here is a list of the programs offered. For more information, see their website at <http://www.michener.on.ca/>

- Applied Biotechnology
- Chiroprody
- Clinical Research Associate
- Diagnostic Cytology
- Echocardiography
- Genetics Technology
- Lamaze Childbirth Educator
- Medical Laboratory Science
- Nuclear Medicine
- Radiation Therapy
- Radiological Technology
- Respiratory Therapy
- Sleep medicine
