

The Department of Geography, University of Canterbury has a high profile in the field of health/medical geography. A joint venture between the University of Canterbury and the New Zealand Ministry of Health led to the establishment of the GeoHealth Laboratory. The aim of the collaboration is to build a strategic partnership between both parties around health geography, spatial epidemiology, and GIS; and to increase research capacity and research outputs in the health and GIS academic sectors. Located within the Dept of Geography, the GeoHealth Lab is based in a well equipped and specifically designated facility on the UC campus in Christchurch. The GeoHealth Lab has research interests particularly in health inequalities, neighbourhoods and health, environment and health and GIS and health. For further information see: <http://www.geohealth.canterbury.ac.nz>

\* Lecturer/Senior Lecturer/Associate Professor/Professor in Geography (Health/Medical Geography), Dept of Geography. This is a continuing full time academic position including teaching, research and graduate student supervision.
