

The BioPharm Graduating Class of 2011 Presents...

The 4th Annual
Honours Biology & Pharmacology
Programme Lectureship

We are pleased to welcome Guest Speaker:

Dr. Patrick Vallance

GlaxoSmithKline Inc. (GSK) Vice President, Medicines Discovery and Development

Making Medicine: Why is it so difficult?

Date: January 26th 2011

Location: MDCL/3020

Time: 6pm

Dr. Vallance joined GSK in May 2006 as Head of Drug Discovery, and on July 1 2010 was appointed Senior Vice President, Medicines Discovery and Development and as a member of GSK's Corporate Executive Team. Dr. Vallance has focused GSK's discovery engine on therapy areas underpinned by the most promising and mature sciences, offering fresh insights into diseases. Part of his expanded role will be ensuring GSK maintains a flow of potential new medicines through the R&D pipeline from early discovery to late stage development.

Prior to joining GSK, Dr. Vallance was a clinical academic and led the Division of Medicine at University College of London as a vascular biologist and clinician scientist with over 20 years' experience of clinical medicine – general internal medicine, cardiovascular medicine and clinical pharmacology.
