CHAPTERS IN BOOKS

23. Jefferson, C; Pehrsson, S; Peterson, T; Chornton, L; Davis, B; Keating, P; Gandhi, S; Fortin, R; Buckle, J; Miles, W; Rainbird, R; LeCheminant, T; Tschirhart, V; Tschirhart, P; **Morris, W**; Scott, J; Cousens, B; McEwan, B; Bethune, K; Riemer, W; Calhoun, L; White, J; Maclsaac, D; Leblon, B; Lentz, D; LaRocque, A; Shelat, Y; Patterson, J; Enright, A; Stieber, C; Riegler, T., 2011, Northeast Thelon region geoscience framework - new maps and data for uranium in Nunavut. Geological Survey of Canada, Open File 6949, 2011; 1 sheet, doi:10.4095/288791.

25. Jefferson, C W; Chornton, L B; Pehrsson, S J; Peterson, T D; Wollenberg, P; Scott, J; Tschirhart, V; McEwan, B; Bethune, K; Calhoun, L; White, J C; Leblon, B; LaRocque, A; Shelat, Y; Lentz, D; Patterson, J; Riegler, T; Skulski, T; Robinson, S; Paulen, R; McClenaghan, M B; Layton-Matthews, D; Maclsaac, D; Riemer, W; Stieber, C; Tschirhart, P., 2011. Northeast Thelon Region: Geomapping for Uranium in Nunavut. Geological Survey of Canada, Open File 6962, 2011; 38 pages 1 CD-ROM, doi:10.4095/289037.

PAPERS IN REFEREED JOURNALS

   Palaeomagnetic studies in the British Caledonides II: The Northern Lake District.

   Palaeomagnetic studies in the British Caledonides V: Miscellaneous new data.

   Palaeomagnetic studies in the British Caledonides VI: Regional and global implications.

   Paleomagnetic results from the Lower Paleozoic of Ireland.

   Transcurrent fault motion determined paleomagnetically and the age of the Acadian orogeny.

   Paleolatitude of glaciogenic upper Precambrian Rapitan group and the use of tillites as
   chronostratigraphic marker horizons.
   Geology, v.5, p.84 - 88.

   Paleomagnetism of the Gowganda and Chibougamau: Evidence of a 2,200 my. old folding and
   remagnetization event in the Southern Province.
   Geology, v.5, p.137 - 140.

   Paleomagnetic results from the Borrowdale Volcanic Group, English Lake District.

   Discovery of the Hadrynian Polar Track and further study of the Grenville problem.

    The use of paleomagnetic data to delineate the history of the development of the Connemara
    Antiform.

    An alternative Paleozoic polar wander path for Gondwanaland.
Paleomagnetism of some late Precambrian sediments from "l'Adrar de Mauritanie", West Africa, and its bearing on the Pan-African orogeny.  

Apparent polar wander paths and the joining of the Superior and Slave provinces during early Proterozoic time: Comment.  
Geology, v.6, p.132 - 133.

Paleolatitude of glaciogenic upper Precambrian Rapitan Group and the use of tillites as chronostratigraphic marker horizons: Reply to G.E. Williams.  
Geology, v.6, p.65.

What happened to the high latitude paleomagnetic poles?  

Paleomagnetism and chronology of Caledonian igneous episodes in the Cross Fell Inlier and Northern Lake District.  

Precambrian dykes: a preferred orientation of intrusion.  
Nature, v.275, p.120 - 121.

The Maumtrasna Group problem: possible Devonian rocks in Murrisk, Western Ireland.  

A graphical approach to polar paths, paleomagnetic cycles and global tectonics.  

A positive contact test between Nipissing diabase and Gowganda argillite.  

Reply to An 'unconventional' Proterozoic paleomagnetic polar wander path for North America, and its advantages.  

Tectonic and metamorphic history of the Sudbury Norite: the evidence from paleomagnetism.  

Paleomagnetism of Lower Cambrian red beds from Cartaret, France. 

A positive fold test in Nipissing diabase. 

The intrusive and tectonic history of the Sudbury micropegmatite: the evidence from paleomagnetism. 

Paleomagnetism of some sulphide occurrences from the South Range of the Sudbury Basin. 

Fault block rotations in the Southern Province as defined by paleomagnetism of the Nipissing diabase. 

Genesis of the Foy Offset and its sulphide ores: The paleomagnetic evidence from a study in Hess Twp., Sudbury, Ontario. 

A paleomagnetic investigation of the Sudbury Basin Offsets, Ontario, Canada. 

Paleomagnetism of the Little Dal Lavas, Mackenzie Mountains, Northwest Territories, Canada. 

A short note on early Cambrian paleomagnetism from Normandy, France. 
34. **Morris, W.A.** and McMechan, M., 1983. 
Paleomagnetism of the Mount Nelson Formation, southern British Columbia, and the correlation of the Belt Series. 

A review of paleomagnetic results from the Carboniferous of North America; the concept of Carboniferous geomagnetic field horizon markers. 

Contemporaneous Marine and Continental Glacial and Interglacial events, Canadian Arctic Archipelago and Central Arctic Ocean. 

Significance of magnetic susceptibility measurements from the Lac du Bonnet Batholith, Manitoba, Canada. 

Glacial and non-glacial sediments of Matuyama paleomagnetic age on Banks Island, Canadian Arctic Archipelago. 
Geology, v.12, p.139 - 142.

Interpretation of magnetic susceptibility: a new approach to geophysical evaluation of the degree of rock alteration. 

The silver deposits at Cobalt and Gowganda, Ontario Part 2: An experiment in age determinations employing radiometric and paleomagnetic measurements. 

Metabasite assemblages of the Sudbury Igneous Complex. 
Canadian Mineralogist, v.25, p.499 - 514.

A paleomagnetic study of the layered mafic intrusion at Sept-Iles, Quebec. 

A comparison of magnetic character and alteration in three granite drill cores from eastern Canada. 

On the lognormal distribution of oxides in igneous rocks, using magnetic susceptibility as a proxy for oxide mineral concentration. 

Interpretation of borehole magnetic data for mineral exploration and lithological mapping. 
Paleomagnetic and pollen chronostratigraphic correlations of the late glacial and post glacial sediments in Lake Ontario.

The Erieau excursion revisited.

Pitfalls and procedures for determining fabric orientations in non-oriented bore core.

Magnetic Interpretation along the Sudbury Structure Lithoprobe Transect.

Preliminary comparison of magnetic property and polycyclic aromatic hydrocarbon (PAH) profiles in Hamilton Harbour sediments.

Preliminary comparisons between mutagenicity and magnetic susceptibility of respirable airborne particulate.
Atmospheric Environment. v.29, No23., p.3441-3450.

The utility of magnetic properties as a proxy for mapping contamination in Hamilton Harbour sediments.

Distribution of contaminated sediment in Hamilton Harbour as mapped by magnetic susceptibility.
Geoscience Canada. v.22, N0 4., p.145-151.

Zonation of contaminated bottom sediments in Hamilton Harbour as defined by statistical classification techniques.

Feasibility of using magnetic properties for assessment of particle associate contaminant transport.

Resuspension and redistribution of sediments in Hamilton Harbour.

The chronology of speleothem development in Northern Yukon and its relationship to permafrost
Canadian Journal of Earth Sciences, v.34, p.902-911.

Use of the ERLIS database for regional magnetic anomaly compilation.  

Borehole correlation in Mineral deposits using geophysical parameters: Duck Pond, Newfoundland.  

Magnetic signature of magnetite-enriched rocks hosting platinum-group element mineralization within the Archean Boston Creek Flow, Ontario.  

Combined 3-D interpretation of airborne, surface, and magnetics at the McConnell nickel deposit.  

Aeromagnetics of southern Alberta within areas of hydrocarbon accumulation.  

Aeromagnetic and gravity evidence for basement control of regional fracture pattern in Paleozoic sediments.  
Proceedings Ontario Petroleum Institute, v.36, p.21-34.

Records of geomagnetic secular variation since 1200 AD and the chronological control of lake sediments in Northern Alberta.  

Enhanced resolution of geological structures from magnetic data: an example from the Abitibi Greenstone Belt.  

Enhancement of magnetic data by the logarithmic transformation  

High resolution magnetic mapping of contaminated sediments in urbanized environments.  

Application of wavelet based filtering to elimination of noise in aeromagnetic data.  

Regional gravity setting of the Sudbury Structure  
Using airborne magnetic and electromagnetic data to monitor mine tailings in Copper Cliff, 
Northern Ontario. 
CIM Bulletin, v.94 (#1056).

Paleomagnetism of Carboniferous sediments from the Stellarton Gap 

The Sudbury Structure: a circular impact crater? 
Geophysical Research Letters, 10.1029/2002GL015255 
31 October 2002.

Basement-controlled faulting of Paleozoic strata in southern Ontario, Canada: Evidence from 
geophysical lineament mapping. 

75. L’Heureux, E., Ugalde, H., Milkereit, B., Boyce, J., Morris, W., Eyles, N., and Artemieva, N., 
2005. 
Using vertical dikes as a new approach to constraining the size of buried craters: An example 
from Lake Wanapitei, Canada. 
Geological Society of America, Special Paper 384

Wavelet denoising of aeromagnetic data. Reply to discussion by M. Fedi and T. Quarta. 

Combining Neodymium isotopic data with aeromagnetic data to identify a duplex thrust sheet in 
the Mattawa region of the Grenville Province. 
Canadian Journal of Earth Sciences v.43(4): 421-432

Identifying structural trend with fractal dimension and topography 
Geology, v.34 (11) p.901 - 904.

An updated magnetic model of Lake Bosumtwi: constraints from borehole logging and 3D vector 
magnetic data. 

Vector Magnetic Data at the Lake Bosumtwi Meteorite Impact Structure, Ghana – A Third Layer 
of Information to the Magnetic Datasets. 

Magnetic remanence constraints on magnetic inversion models  

Borehole magnetics navigation: An example from the Stratmat Deposit, Bathurst, New Brunswick.  
Leading Edge, v.27, p.106-111.

An assessment of topographic effects on airborne and ground magnetic surveys  
Leading Edge v.27, p.76-79.

Litho-Magnetostratigraphy of the Athabasca oil sands.  

Evidence for basement fault reactivation in southern Alberta: An integrated topography and  
airborne magnetics approach.  

A comparison of weakly constrained and fully constrained unmixing for mine site mapping.  

Environmental management of mine-sites with LIDAR altimetry and hyperspectral imaging.  

90. Shang, JL; **Morris, B;** Howarth, P, et al., 2009.  
Mapping mine tailing surface mineralogy using hyperspectral remote sensing.  

91. **Morris, W. A;** Ugalde, H; Markham, K.J., 2009.  
Remote predictive mapping of Cretaceous sediments in the Cypress Hills area, Alberta, using  
terrain data acquired from aeromagnetic surveys.  

92. Madeline Lee, **Bill Morris, and** Herman Ugalde, 2010.  
Effect of signal amplitude on magnetic depth estimations,  
The Leading Edge, v. 29, p. 672; doi:10.1190/1.3447778

93. Madeline Lee, **Bill Morris, and** Herman Ugalde, 2010.  
Mapping of apparent magnetic susceptibility and the identification of fractures: A case study from  
the Eye-Dashwa Lakes pluton, Atikokan, Ontario,  
Geophysics, v.75(3), B147:URL: DOI: 10.1190/1.3427636

94. Herman Ugalde and **William A. Morris, 2010.**  
Deriving geological contact geometry from potential field data.  

95. Herman Ugalde and **William A. Morris, 2010.**
Cluster analysis of Euler deconvolution solutions: New filtering techniques and geologic strike determination,

Integration of lithological, geophysical, and remote sensing information: a basis for remote predictive geological mapping of the Baie Verte Peninsula, Newfoundland.

Structure of the Betts Cove Ophiolite Complex beneath the western margin of Notre Dame Bay, Newfoundland.

98. Spicer, B., **Morris, B**., and Ugalde, H., 2011.
Structure of the Rambler Rhyolite, Baie Verte Peninsula, Newfoundland: Inversions Using UBC-GIF Grav3D and Mag3D.

An automatic network-extraction algorithm applied to magnetic survey data for the identification and extraction of geologic lineaments.

100. Lee, M.D., **Morris, W.A.**, Harris, J., and Leblanc, G., 2012.
A network extraction tool for mineral exploration: a case study from the Wopmay Orogen, Northwest territories, Canada.
Exploration Geophysics. v.43(2), 116-124.

A simple adaptable fusion methodology for geophysical exploration.
Exploration Geophysics. v.43(3), 190-197.

Curvature analysis to differentiate magnetic sources for geologic mapping
Geophysical Prospecting, v.61(S1), 572-585.

3D geophysical inversions of the northeast Amer Belt and their relationship to geologic structure.
Geophysical Prospecting. V.61 (s1), 547-560.

PAPERS IN REFEREED CONFERENCE PROCEEDINGS

Significance of magnetic susceptibility measurements from the Lac du Bonnet area Batholith, Manitoba, Canada. O.E.C.D. Symposium Volume, Ottawa Meeting.

Application of magnetic susceptibility to the degree of alteration.

Paleomagnetic results from the Carboniferous of North America; the development of a chronostratigraphic marker horizon for the East Coast Carboniferous Basin.

Magnetic properties of rocks from boreholes CR-1 to CR-9 at Chalk River Research area, Ontario. AECL TR - Series.

   Borehole magnetics: In-Situ magneto-stratigraphy. An example from UNAM-7, Chicxulub, Mexico  

   Cluster analysis of Euler deconvolution solutions: New filtering techniques and actual link to  
   geological structure.  

   Spatial domain filtering of specific frequencies: Curvature isolation of potential field signals  

47. Bongajum, E., White, I., Milkereit, B., Qian, W., **Morris, W.A.**, Nasseri, M.H.B.,  
   Multiparameter petrophysical characterization of an orebody: an exploration case history  
   RockEng 09.

   Amplitude effects of magnetic signals on depth estimation routines.  
   SAGA’09.

   Qualitative geophysical interpretation of the Sudbury Structure  

   Curvature analysis for geological mapping and mineral resource assessment  

   Integrating geological constraints in geophysical models.
